“Bringing Your Life to Art And Your Art to Life”

This workshop will help you explore your creativity and help get you into the flow of your motivational life experiences, then provide easier ways of bringing your paintings to life in a joyful environment. Even the very best artists need these concepts presented in fresh new ways and welcome guidance via individual critiques. Bill spends a lot of time trying to discern what makes the process of painting easier, learning how to motivate artists, and how to transfer the transcendent experience of life to canvas so the canvas comes to life. Students state over and over, Bill's teaching methods are always updated, refreshing and provide the ultimate in growth. He can assess a workshop attendee's stage quickly and help accelerate your growth to your next level.

We will work extensively with exploring our motivations and conveying these experiences, easing into design, unifying the painting, setting up beautiful lighting effects, and creating harmonious colors. We will explore what makes interesting paintings. We will have the infamous and fun RAFFLE OF BILL'S DEMOS and other great items.

Class size is limited.
