FINE ART AUCTION

Jorge Arcos

"My art is an expression overflowing with how I perceive the world. The pallet is usually colorful and spontaneous, merged into an uncontrollable composition of organic forms. Thanks to my Hispanic heritage, coming from a culturally rooted country, my work portrays lively, bold, and energetic characteristics. Looking at a world that it is full of nuances and changes, my focus comes from inner feeling about life.

Through a journey of learning, my work conveys self-discovery and evolution, communicating to the viewer, my personal view and perception of the world around me; quieting mind, and carrying my ideals through colors and shapes, eluding conformity and traditionalism. I am an artist because I was born to be one. I am alive because I am an artist, a painter; it feeds my soul. My motivation to paint is to live and to express every moment of my life and to relish the simple fact of being alive."
