

Professional photographer in Miami for more than 50-years. I have lived in Gainesville, Ga, for almost two years

My work consisted of countless styles and varieties of photography, including:

Studio and outside portraiture, commercial, events, products, schools, sports, clubs, travel, racing, and scenic, among others.

Former owner and/or operator of two camera stores, photo labs, and photo studios.

Instructor of various photography courses that included models and subjects, and outdoor location classes.

Lecturer, speaker on photography for various clubs, universities, colleges, and schools.

My method of teaching is geared to bring students up to speed so they can shoot good photos rather quickly – as soon as after the first presentation or class – and therefor evolve into their own preferred style, photographic desires, and goals.

My program is entertaining and humorous using countless photos and graphics projected on a screen with a PowerPoint program, using a wireless mic, and sound system. Handouts will also be provided.
