FINE ART AUCTION

Stan Susky

I am a Photographer in the Atlanta, Georgia area. I've been actively practicing my craft for over 45 years and have gone from film to digital and back again. My primary interest nowadays is alternative photography techniques such as cyanotypes and encaustic finishing that produce unique "one of a kind", hand made images.

Several years ago I discovered several artists that were incorporating melted beeswax into their mixed media and photographic work. Their results were ethereal and beautiful and I decided to give it a try. Despite some truly horrific beginnings, I love the process and now use it almost exclusively with all of my framed pieces.
